Examiner's Statement of Reasons for Allowance

1. Claims1-5 are allowed because the prior art fail to teach a first operational amplifier having a non-inverting input receiving reference voltage and having its output providing a high conversion threshold, the non-inverting input of the first operational amplifier being connected to the junction point of two variable resistive elements series connected between the output terminals of the first amplifier and a supply potential, and a second operational amplifier having an inverting input terminal receiving an analog voltage depending on temperature and having a non-inverting input connected to the midpoint of the amplifier and said supply reference potential, the second operational amplifier providing an amplified voltage to be converted by an analog-to-digital converter, in combination with the remaining limitations of claims 1-5.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.
